

ST. MONICA SCHOOL

"Learn, live, and love through Jesus..."

April 4, 2011

Dear St. Monica School Families,

On Monday, March 21st, the school staff spent the entire in-service day being trained to use StandardsScore (previously known as Webgrader). This standards-web based program will enable staff to connect each lesson to the state standards while grading their students through summative and formative assessments. When we fully implement the program this fall, teachers will be able to communicate to parents through Webnotes while providing parents 24/7 total access to their child's assignments and progress.

The fourth quarter of this school term will be used for staff to become familiar with all the facets StandardsScore has to offer educators. My intent is that by fall all teachers will be able to use StandardsScore to its fullest capabilities while providing parents with access to monitor their child's assignments, projects, quizzes, tests and current progress.

The staff and I are very excited to begin practicing and using StandardsScore. We all look forward to presenting it to the school parents next fall.

Sincerely,

Principal Julie Ann Robinson
