

Sam Vincent

Class of 2011

Six Variety Shows, many teachers, and one upcoming South Dakota trip, what a great time I've had at St. Monica School! I have spent six years at St. Monica School; I have made a lot of friends, and experienced so many great memories. I came to St. Monica in third grade after spending four years at Richards. I was very scared and nervous going into the first day of school because I probably knew only two kids. This school could not have welcomed me any better and I quickly became comfortable coming to school here.

I know that all the things that I learned at St. Monica will prepare me for the road ahead in high school. I have never really liked school, but St. Monica has taught me that you can have good times in school. The only things that I did not like doing were wearing uniforms and going to mass every week. After a while you get used to the uniforms and they help because you do not have to pick out what clothes you are wearing every morning. Going to church and Religion classes have really helped me learn about our faith and I am glad I had to do them. I have a lot of great memories and I have made a lot of friends. I truly believe that I am going to miss this school.
